

As a member of our Sweet Hart Dental family, we care deeply about your health and well-being. We have been closely following updates on recommendations from the CDC as well as the American Dental Association.

In addition to following the usual Standard Precautions, we are implementing some changes to ensure the safety of our patients as well as our team members.

- All magazines will be removed from the lounge.
- All high touch surfaces in common areas will be disinfected routinely throughout the day.
- Upon arrival, you will be asked to wash your hands.
- You will also be asked about any recent travels or that of any family members/co-inhabitants.
- We will take your temperature as well.
- If it makes you more comfortable to wait in your car, you have the option of calling us to alert us of your arrival. We will alert you to come in when your operatory is ready.
- Once you have been brought to your operatory, you will be given a pre-procedural rinse to be used prior beginning your treatment.

We ask that only well patients and necessary caregivers present for appointed procedures. As such, we will reschedule any appointments as needed due to fever, coughing, sneezing, headaches or extreme fatigue.

Thank you for your understanding as we try to do our part to “flatten the curve.”

Be Safe.
